

Bedrijfsdetails

Follow your heart. Use your head.

Money always sets something into motion. At Triodos Bank, with our around 1,700 co-workers, we make money work for positive societal change. Inspired by this mission, for 40 years we have been financing businesses, organisations and projects that seek to achieve positive change in social, ecological and cultural domains. We are enabled to do so by savers and investors who share our values and contribute to an honest, sustainable and humane society. We only invest in the real economy and do not trade in complex financial products. We furthermore make a point of knowing all our clients and entrepreneurs that choose to bank with us.

People make the difference: at Triodos Bank we are very aware of this. Together we create a sustainable society, and this obviously starts with our co-workers. Several regular training sessions, reflection and our systematic attention for personal development help ensure that we make a difference together. We keep each other focused and are all dedicated to the Triodos mission.

Functie

At Triodos Bank, we build our own core banking software including Backoffice, mobile and web apps. We are always looking for great technical people to join our development team. The main focus of our current vacancies is that of

Test Data Engineer (32 - 40 hours)

Help us building the software that supports our mission

With our software we support the mission of Triodos Bank, focusing increasingly on the needs and experience of our customers. To build good software we need good test data and with our requirements getting ever tighter, having properly depersonalized, yet representative test data requires continuous attention.

Do you have affinity with testing and test data, and do you have an engineer mindset? We are looking for a dedicated Test Data Engineer who develops and maintains test data sets for our

Take action

- Develop and maintain a depersonalized test data set including regular changes for our in-house applications.
- Develop and maintain depersonalized test data sets including occasional changes for third-party applications that are integrated with our in-house applications.
- Make sure test data sets are compliant with current Data Privacy regulations.
- Collaborate with teams in various domains to provide them with standardized data sets that fit their needs.
- Improve test data usability, e.g. by using personas so that teams can create and demonstrate easily recognizable test cases.
- Maintain IBM InfoSphere Optim tooling.

Profiel

This is you

- You have a strong connection with Triodos Bank's mission.
- You have completed an ICT education on HBO/WO level and have several years of experience as test data engineer, tester or developer.
- You have broad experience with working with databases and DB queries (SQL).
- You are passionate about testing and CI/CD.
- You are meticulous and patient.
- You are eager to learn and grow as a professional, which means developing both technical skills and emotional intelligence to collaborate with colleagues from various teams.

- You strive to make continuous improvements, both in technology and in the process.
- Experience with ETL tooling is a pre.
- Experience with depersonalization is a pre.
- Experience with IBM InfoSphere Optim is a pre.
- Experience in Banking/Finance is a pre.

Aanbod

Location

The award-winning sustainable office is based in Driebergen-Zeist, the Netherlands Reehorst, just 3 minutes' walk from the train station.

Remuneration

Impact on society is the number one priority, both for us and for you. Our employer reflect this vision. This includes:

- a salary appropriate to the position, our remuneration policy and your capabilities.
- an attractive pension policy.
- if you use public transport for commuting, you can use the mobility card for free private travels as well.
- flexible working hours and the opportunity to work from home.
- reimbursement under our company bicycle scheme to a max of € 1,500.
- 30 holiday days with a 40-hour working week, plus the option of buying 2 weeks of extra holiday days.
- extra leave to participate in voluntary work.
- a range of education and training opportunities.
- the option to join our collective health insurance.
- a working from home allowance per home office day.
- health and safety equipment of € 750 every 5 years.

For more information about this position, please contact Maarten Nooter, Team Lead maarten.nooter@triodos.com or phone 030-6942541.

Please send in your application via the apply button before **June 30** to the attention of Recruiter. Applications via e-mail or LinkedIn will not be processed. We would like to see you!

We reserve the right to close the vacancy earlier if there are enough good candidates.

Acquisition as a result of this vacancy is not appreciated.
